EXHIBIT B

City of Conroe
Annexation Service Plan
For Annexation Parcel 2014-02

I. TERRITORY

This service plan is applicable to 1,295 acres of land located in the A-0006 William C. Clark Survey, A-0003 William Atkins Survey, A-0037 James Smith Survey and A-0041 John T. Vince Survey in Montgomery County, Texas. The territory is located in the general vicinity north/northwest of the intersection of State Highway 105 West and Tejas Boulevard. A map of the area is attached hereto and incorporated herein by reference. The territory consists primarily of Montgomery County Utility Districts (MUDs) 3 & 4, which includes April Sound, April Villas, Lake View Village, Water Oak and Waterpoint.

II. GENERAL PROVISIONS

a. Effective Term. This service plan shall be in effect for a ten-year period commencing on the effective date of the annexation.

b. Amendment or Renewal. This service plan may be amended from time to time as provided by Local Government Code, Sec. 43.056(k). Renewal of the service plan shall be at the sole option of the Conroe City Council.

c. Intent. It is the intent of the City of Conroe that this service plan shall provide for the delivery of full municipal services to the annexed area in accordance with State law. The failure of this plan to describe any particular service shall not be deemed to be an attempt to omit the provision of such services from the annexed area. The delivery of municipal services may be accomplished through any means permitted by law.

d. Level of Services to be Provided. It is the intent of the City of Conroe to provide the level of services required by State law. The City Council finds and determines that the level of services, infrastructure and infrastructure maintenance provided within the area prior to annexation is not greater than is provided in the City. The City Council finds and determines that the services, infrastructure and infrastructure maintenance proposed by this plan are comparable to that provided to other parts of the City with topography, land use, and population density reasonably similar to the annexed area. The City Council finds and determines that implementation of this plan in the manner proposed will not reduce the level of fire, police, and emergency medical services available within the City.
III. SERVICES TO BE PROVIDED AT ANNEXATION

These services will be provided within the annexed area immediately upon the effective date of the annexation. In the case of a gated subdivision, it will be the responsibility of the Property Owners Association (POA) to provide emergency personnel and City staff access, particularly in cases where the access mechanism changes on or after annexation.

a. Police Protection. Police services include criminal investigations, routine patrol and dispatched response to both emergency and non-emergency service calls.

As a result of this annexation, patrol officers or patrol units are necessary to serve the area. It is anticipated that police services within the annexed area will be provided utilizing routine patrol units out of a new Police District.

Currently, the nearest police station is Police Headquarters, which is located at 700 Old Montgomery Road.

b. Fire Protection. The Conroe Fire Department will provide emergency fire suppression and routine fire prevention services within the annexed area.

The Conroe Fire Department does not provide primary EMS services. The Montgomery County Hospital District currently provides EMS services throughout the County. Fire fighters may be dispatched to the scene of accidents or other medical emergencies to assist Hospital District EMS personnel or to provide “first responder” services pending the arrival of EMS personnel.

The Fire Department currently operates five fire stations that are located on North Loop 336 East, East Foster Drive, Sergeant Ed Holcomb Boulevard, Carter Moore Drive (North FM 3083 West) and Walter Woodson Drive (FM 1488). Each station responds to service calls within a primary zone but may be called upon to provide support within other areas of the City as necessary. The annexed area will be incorporated in a new Fire Zone. The City of Conroe will either construct or acquire a fire station to serve the annexed area. The station(s) assigned to the annexed area may be altered from time to time in response to service demands, shifts or growth in population, future annexations or other relevant considerations.

Montgomery County Emergency Services District (ESD) No. 3 currently provides fire protection services to the area out of Lake Conroe Fire Department (LCFD) Station 31. After the area is annexed to Conroe, the City will require the ESD to remove the area from the territory of the ESD.
c. Solid Waste Collection. The City provides fee based household garbage and recycling collection services to single family residences. The City does not collect garbage or recycle from most commercial establishments. Commercial garbage collection and disposal and/or recycling and is available from privately owned collection businesses that currently hold a franchise with the City. Apartments and other multifamily buildings are considered commercial and must obtain collection services from private business. The City may, at its discretion, agree to provide garbage and recycling service to small commercial establishments that generate waste collection demands similar to a single-family residence.

The City currently provides residential garbage and recycling collection for single-family residences at the street curb using a contract service provider. The current contract provider employs an automated collection system that requires the use of specific collection containers. In accordance with the currently established policy each household is provided, without charge, a collection container for waste disposal and a collection container for recycling. Additional containers for recycling are available at no charge, while additional containers for waste disposal are available for a fee.

Bailey Garbage Service, a privately owned solid waste management service is currently the exclusive provider of residential solid waste collection services within April Sound and may continue to provide such exclusive service until the second anniversary of the annexation. At any time after the second anniversary of the annexation the City may require Bailey Garbage Service to discontinue such service on six (6) months written notice, in which event City shall provide residential waste collection services on the same basis as provided to other residential customers of the City. The City shall promptly commence the provision of residential waste collection services if, at any time following annexation, Bailey Garbage Service fails or ceases to provide such service.

d. Maintenance of Water and Wastewater Facilities. MUDs 3 & 4 currently provide water and wastewater utility service within the area to be annexed. Subject to the adoption of a Strategic Partnership Agreement between the Districts and the City as provided by Texas Local Government Code Section 43.0751 the City will agree to the continued existence of the Districts as “limited districts” after the date of full-purpose annexation. The limited districts may continue to exist for the purposes of owning, operating and maintaining the water utility system(s), but for no other purposes. The powers of the limited districts shall be more fully set out in the Strategic Partnership Agreement but shall include the authority to set the rates and charges for water utility service and to issue debt secured by pledging the revenues of the water utility system(s). The water utility system(s) may be operated by the limited Districts in conformity with the groundwater reduction plan (GRP) previously adopted by the Districts and approved by the Lone Star Groundwater Conservation District. The limited Districts shall not be required to participate in the City’s groundwater reduction
plan. Any such Strategic Partnership Agreement shall also provide for the disposition of the remaining assets and obligations of the Districts.

Unless otherwise agreed in a Strategic Partnership Agreement as provided above, after the area is annexed to Conroe, the districts will be abolished pursuant to Texas Local Government Code Section 43.075 and the City will succeed to the powers, duties, assets and obligations of the districts. The City will thereafter be responsible for the operation and maintenance of all water and wastewater facilities previously owned by the districts and the operations of the water utility system shall become subject to the City’s groundwater reduction plan.

Privately owned water wells, septic or aerobic wastewater systems are not affected by annexation and the owners of such systems may keep and continue to operate them as long as they are maintained in proper working order and do not present a threat to public health or safety.

e. Maintenance of Roads, Streets and Street Lighting. The City is not responsible for the maintenance of private streets or roads in the annexed area. April Sound is a private street gated community and the streets within the neighborhood are not dedicated to the public. The City will not maintain the private streets or provide street lighting services on the streets in the April Sound community. The April Sound POA will continue to provide maintenance of the subdivision streets and may continue to control access via the security gate. The City will work with the POA to coordinate access to the neighborhood by police, fire and other emergency services.

No public streets have been identified in the area, however, the City will assume the responsibility for maintenance of public streets and roads previously accepted for maintenance by official action of the Commissioners Court of Montgomery County. Any such streets or roads formerly maintained by Montgomery County that become subject to City maintenance will be maintained in a condition which is at least equal to the County maintenance standard; however, the City will not be required to reconstruct or upgrade such streets to a higher standard.

It is the responsibility of the developer to construct or provide those streets or roads necessary to serve the demands of new development in the areas to be annexed. The City may accept the dedication of public streets constructed in accordance with applicable development regulations of the City and will thereafter be responsible for their maintenance.

f. Maintenance of Parks, Playgrounds and Swimming Pools. There are no public parks, playgrounds, or swimming pools within the area to be annexed. Private recreational facilities, open spaces and swimming pools are unaffected by the annexation.
g. Maintenance of any other Public Building, Facility or Service. Annexation does not transfer ownership of most public buildings, facilities or services, all of which should continue to be maintained or provided by the public entity that currently owns or provides them. Privately owned facilities, including privately owned and operated storm water detention facilities, are not affected by the annexation.

An appropriate City Department will be assigned to assume responsibility for the maintenance or provision of any facilities or services which become the responsibility of City and are not covered by this service plan.

IV. CAPITAL IMPROVEMENTS

Construction of these capital improvements will be substantially completed within 2½ years.

a. Police Protection. No additional capital improvements are needed at this time to provide police services.

b. Fire Protection. The City will construct or acquire a fire station and the necessary equipment to service the area. The City will negotiate with ESD 3 for the purchase of LCFD Station 31 and any equipment that is no longer required by ESD 3 as a result of the removal of the annexed area from the territory of the ESD. If the City is unable to acquire Station 31, it will establish a temporary location within or in the vicinity of the annexed area in order to provide fire protection service to the territory after its removal from the territory of the ESD.

c. Solid Waste Collection. No capital improvements are needed at this time to provide solid waste collection services.

d. Water and Wastewater Facilities. No capital improvements are needed at this time to provide water and wastewater services.

e. Roads, Streets and Streetlights. No new roads, streets or street lights are needed at this time. It will be the responsibility of the developer of the property to provide the roads and streets necessary to serve new development within the annexed area.

f. Parks, Playgrounds and Swimming Pools. No capital improvements are needed at this time to provide recreational services.

g. Other Public Buildings, Facilities or Services. No capital improvements are needed at this time to provide other public services.
V. WATER AND WASTEWATER SERVICE EXTENSION POLICIES

The City provides fee based water and wastewater services to the portions of the City which are not within an area served by another water or wastewater utility. Water and wastewater services are generally only provided to lots that have been properly subdivided or platted. The City may decline to provide service to any property that is not platted.

For lots that have water or wastewater lines in an abutting street or easement, the owner may receive water or wastewater service by applying for a City tap and paying any required fees.

The provision of water and wastewater facilities for new development within the City is primarily governed by the City’s building code and subdivision ordinances that are found in Chapters 14 and 94 of the City Code of Ordinances. New development must be served by owner/developer provided public water and wastewater facilities that meet the City’s standard requirements. Upon construction and dedication by the owner/developer the City agrees to provide services via the facilities and thereafter to maintain them.

Facilities necessary to serve a new development are provided at the sole cost of the owner/developer. Such facilities include not only those which are located within the owner/developer’s property, but also any exterior mains which must be extended to connect the property under development to the point of connection with the City’s existing facilities. The City need not compensate the owner/developer for the ordinary costs of extending exterior mains. The owner/developer may be reimbursed for ordinary exterior main extension costs through the imposition of lot or acreage fees to be levied against other adjacent properties upon connection to the owner/developer constructed mains.

The City may require that the owner/developer provide oversized water or wastewater facilities. In such cases the City will pay the reasonable cost of such oversizing. Whether or not a particular line sizing constitutes “oversizing,” is determined upon the basis of generally accepted sound engineering design practices.

In newly annexed areas, the City examines the need for line extensions to serve existing development that does not currently receive water or wastewater services. The City will determine the need for the construction of lines and facilities to serve existing development after giving due consideration to the topography, land use, population density, adequacy of existing private water wells and septic tanks and anticipated levels of demand. The City will not undertake line extensions to serve such existing development unless the new lines will be logical, reasonable and prudent extensions of the City’s existing facilities.
From time to time, upon the request of an interested property owner the City will consider whether or not line extensions previously deemed unnecessary have become necessary as a result of changed conditions.

The City may recover the capital costs of extending water or wastewater facilities to serve existing development through the use of impact fees, assessments or any other method authorized by law.

Once sewer lines become available in an abutting street or easement the City may require that existing development connect to the City sewer system.
