I. STATEMENT OF PURPOSE

The City of Conroe (City) has an important responsibility to its citizens to carefully account for public funds, manage municipal finances wisely, manage growth, and plan the adequate funding of services desired by the public, including the provision and maintenance of public facilities. In these times of rapid growth in the Conroe area, the City needs to ensure that it is capable of adequately funding and providing those local government services needed by the community. The following Financial Management Policy is designed to establish guidelines for the fiscal stability of the City. The watchwords of the City's financial management include integrity, prudent stewardship, planning, accountability, and full disclosure.

The scope of these policies generally spans, among other issues, accounting, auditing, financial reporting, internal controls, operating and capital budgeting, revenue management, cash and investment management, expenditure control, asset management, debt management, and planning concepts, in order to:

1. **demonstrate to the citizens of Conroe, the investment community, and the bond rating agencies that the City is committed to a strong fiscal operation**;

2. **provide precedents for future policy-makers and financial managers on common financial goals and strategies**;

3. **present fairly and with full disclosure the financial position and results of the financial operations of the City in conformity to Generally Accepted Accounting Principles (GAAP); and**

4. **determine and demonstrate compliance with finance-related legal and contractual issues in accordance with provisions of the Texas Local Government Code and other pertinent legal documents and mandates**.

The City Council will annually review and approve the Financial Management Policy as part of the budget process.

II. FORM OF GOVERNMENT

The governing body of the City is a mayor-council format, which is composed of five councilmen and a mayor elected at large. The elected officials enact local legislation,
The City Council determines all matters of policy, including the duties listed in Article III, Section 3.07 of the City Charter, while the Mayor exercises and performs the duties in Article III, Section 3.08. These include, but are not limited to, being recognized as the head of the City government for all ceremonial purposes, by the courts for civil process, and by the government for purposes of military law. In times of public danger or emergency, the Mayor takes command of the police, maintains law and order, and enforces the law. Wherein the Charter gives the City Council the authority to appoint administrative heads, the Mayor makes these appointments subject to the approval of the Council.

In addition to the responsibilities listed in Section 4.10-12 of the Conroe City Charter, “Director of Finance Powers and Duties,” the Assistant City Administrator/Chief Financial Officer is responsible for reporting deviations from this Policy to the City Administrator, Mayor, and City Council.

The City shall duly appoint a qualified Internal Auditor, who shall carry the designation of Certified Internal Auditor from the Institute of Internal Auditors. As per Ordinance No. 1771-09, the Internal Auditor is responsible for the following:

...conduct financial, operational and compliance audits in accordance with accepted professional standards to determine internal compliance with applicable laws, regulations, policies and procedures. As time permits the internal auditor may perform such additional duties as may be requested by the director of finance or are assigned by the city council. The internal auditor shall report to the mayor and city council and may not be removed or suspended except by majority vote of the city council.”

III. OPERATING BUDGET POLICY STATEMENT

A. Preparation

Budgeting is an essential element of the financial planning, control, and evaluation process of municipal government. The "Operating Budget" is the City's annual financial operating plan. The budget includes all of the operating departments of the City. It also includes the debt service funds, all capital improvement program funds, all enterprise funds, and the internal service funds. The Finance Department prepares the budget, with the cooperation of all departments, under the direction of the City Administrator. The Mayor and City Administrator make any necessary changes, and then the Mayor transmits the document to the City Council.

1. Proposed Budget: The Mayor shall, between sixty and ninety days prior to the beginning of each fiscal year, submit to the City Council a proposed budget. Such budget shall provide a complete financial plan for the fiscal year within the provisions of the City Charter.
a. A budget message, explanatory of the budget, shall contain an outline of the proposed financial policies of the City for the fiscal year, set forth the reasons for changes from the previous year in expenditure and revenue items, and explain any major changes in financial policy.

b. The budget shall include four basic segments for review and evaluation: (1) personnel costs, (2) base budget for operations and maintenance costs, (3) supplemental adjustments for increases or decreases to existing service levels, and (4) revenues.

c. The budget review process shall include City Council participation in the development of each of the four segments of the proposed budget.

2. **Adoption:** The budget and all supporting schedules shall be filed with the City Secretary, be submitted to the City Council, and shall be a public record. The City Administrator shall make a copy available to any resident of the City, upon request.

At a meeting of the City Council, the City Council shall fix the time and place of a public hearing on the budget and shall cause to be published in the official newspaper of the City, a notice of the hearing setting forth the time, place, and date, at least (10) days before the date of the hearing. At the time and place set forth in the notice required above, or at any time and place to which such public hearing shall from time to time be adjourned, the City Council shall hold a public hearing on the budget submitted and all interested persons shall be given an opportunity to be heard for or against any item, or the amount of any item, therein contained. The budget shall be adopted by the favorable vote of a majority of the members of the whole City Council.

The budget shall be finally adopted not later than fifteen (15) days prior to the beginning of the fiscal year, and should the City Council fail to so adopt a budget, the then existing budget together with its tax-levying ordinance and its appropriation ordinance shall be deemed adopted for the ensuing fiscal year. Additionally, the existing contract for the collection of ad valorem taxes between the City and the Montgomery County Tax Assessor/Collector stipulates that the City must adopt the budget and tax rate by September 1 of each year.

3. The Operating Budget shall be submitted to the Government Finance Officers Association (GFOA) annually for evaluation and consideration for the Distinguished Budget Presentation Award.
B. Balanced Budget

The Operating Budget will be balanced with current revenues, exclusive of beginning resources greater than or equal to current expenditures/expenses. Excess balances may be used for capital outlay or other non-recurring expenditures.

C. Planning

The budget process will be coordinated so as to identify major policy issues for City Council consideration several months prior to the budget approval date so that proper decision analysis can be performed. Additionally, long-range planning will be performed such that revenues and expenses/expenditures for the next three years are projected and updated annually, examining their diversity and stability, in conjunction with other guidelines and using an objective analytical projection process.

D. Reporting

Monthly financial reports will be prepared to enable the department heads to manage their budgets and to enable the Assistant City Administrator/CFO to monitor and control the budget as authorized by the City Administrator. Monthly summary financial reports will be presented to the City Council. Such reports will be in a format appropriate to enable the City Council to understand the total budget picture.

E. Avoidance of Operating Deficits

The City shall take immediate corrective actions if at any time during the fiscal year expenditure and revenue re-estimates are such that an operating deficit is projected at year-end.

F. Maintenance of Capital Assets

Within the resources available each fiscal year, the City shall maintain capital assets and infrastructure at a sufficient level to protect the City’s investment, to minimize future replacement and maintenance costs, and to continue service levels.

G. Periodic Program Reviews

Periodic program reviews for efficiency and effectiveness shall be performed. Programs not meeting efficiency or effectiveness objectives shall be brought up to required standards or be subject to reduction or elimination. The City shall explore and develop to the extent possible service trends and definitions in an effort to establish a “reward/profit sharing” system.
H. Purchasing

The City shall make every effort to maximize any discounts offered by creditors/vendors. Vendors with balances due the City will have payments due the vendor offset against the amount due the City. The City will follow state law concerning the amount of the purchase requiring formal bidding procedures and approval by the City Council. For purchases where competitive bidding is not required, the City shall obtain the most favorable terms and pricing possible. Every effort will be made to include minority business enterprises in the bidding process. The City of Conroe Purchasing Policy is included with this policy as Appendix A.

I. Reserves and Contingency Funds

The City’s funds will maintain minimum fund balances and/or working capital balances as stated in Section VIII.B. of this policy to total annual expenditures.

IV. REVENUE MANAGEMENT

A. Optimum Characteristics

The City will strive for the following optimum characteristics in its revenue system:

1. Simplicity: The City, where possible and without sacrificing accuracy, will strive to keep the revenue system simple in order to reduce compliance costs for the taxpayer or service recipient. The City will avoid nuisance taxes or charges as revenue sources.

2. Certainty: A knowledge and understanding of revenue sources increases the reliability of the revenue system. The City will understand its revenue sources and enact consistent collection policies to provide assurances that the revenue base will materialize according to budgets and plans.

3. Equity: The City shall make every effort to maintain equity in its revenue system structure (i.e., the City shall seek to minimize or eliminate all forms of subsidization between entities, funds, services, utilities, and customers’ classes).

4. Revenue Adequacy: The City shall require that there be a balance in the revenue system (i.e., the revenue base will have the characteristics of fairness and neutrality as it applies to cost of service, willingness to pay, and ability to pay). All revenue forecasts shall be conservative.

5. Administration: The benefits of a revenue source shall exceed the cost of levying and collecting that revenue. The cost of collection will be
reviewed annually for cost effectiveness.

6. **Diversification and Stability:** A diversified revenue system with a stable source of income shall be maintained. This will help avoid instabilities in revenue sources due to factors such as fluctuations in the economy and variations in the weather. A balance between elastic and inelastic revenue sources also achieves this stability.

B. **Other Considerations**

The following considerations and issues will guide the City in its revenue policies concerning specific sources of funds:

1. **Cost/Benefit of Abatement:** The City will use due caution in the analysis of any tax or fee incentives that are used to encourage development. Ideally, a cost/benefit (fiscal impact) analysis will be performed as part of such caution.

2. **Non-Recurring Revenues:** One-time or non-recurring revenues will not be used to finance current on-going operations. Non-recurring revenues should be used only for one-time expenditures such as long-lived capital needs. They will not be used for budget balancing purposes.

3. **Property Tax Revenues:** All real and business personal property located within the City shall be valued at 100 percent of its fair market value for any given year based on the current appraisal supplied to the City by the Montgomery Central Appraisal District.

   A 99.5 percent collection rate shall serve each year as a goal for tax collections. All delinquent taxes shall be aggressively pursued each year by the Montgomery County Tax-Assessor/Collector as per the contract with the City. Tax accounts delinquent greater than 90 days shall be submitted for collection each year to an attorney selected by the Montgomery County Tax Assessor/Collector, as provided in his contract with the City. A penalty shall be assessed on all delinquent property taxes, which shall include all court costs as well as an amount for compensation of the attorney, as permitted by State law, and in accordance with the attorney's contract with the County.

4. **Interest Income:** Interest earned from investment of available monies, whether pooled or not, will be distributed to the funds in accordance with the equity balance of the fund from which monies were provided for investment.

5. **User-Based Fees and Service Charges:** For services associated with a user fee or charge, a fee will offset the direct and indirect costs of that
service where possible. Fees will be reviewed at least every three years to ensure that fees provide adequate coverage of costs of services. The appropriate department will review and recommend any changes to the City Council. User charges may be classified as "Full Cost Recovery," "Partial Cost Recovery," or "Minimal Cost Recovery," based upon City Council policy.

Full fee support (80-100%) will be obtained from enterprise utilities and licenses and permits for their associated costs. Charges for miscellaneous licenses and fines and all adult sports programs will generate partial fee support (40-70%). Minimum fee support (0-30%) will be obtained from youth programs.

6. **Enterprise Fund Rates:** The City will review and adopt utility rates, as needed, which will generate revenues required to fully cover current operating and maintenance expenses, meet the legal restrictions of all applicable bond covenants, and provide for an adequate level of working capital.

Additionally, enterprise activity rates will include transfers to the General Fund as follows:

a. **General and Administrative Charges:** Administrative costs will be charged to all funds for services of general overhead, such as administration, finance, personnel, engineering, legal counsel, and other costs, as appropriate. The charges will be determined through an indirect cost allocation following accepted practices and procedures.

b. **In-Lieu-of-Franchise Fee:** In-Lieu-of-Franchise Fee includes part of the rate computation at 4 percent of gross revenues less impact fees, consistent with the franchise rates charged to investor-owned utilities franchised to operate within the City.

7. **Intergovernmental Revenues:** Any potential grants will be examined for matching requirements. Generally, these revenue sources should be used for capital improvements that are consistent with the Capital Improvement Program whose operating and maintenance costs have been included in the Operating Budget or for special programs associated specifically with the grant.

8. **Revenue Monitoring:** Actual revenues received will be regularly compared to budgeted revenues and variances will be investigated. This process will be summarized in the appropriate periodic report.
V. EXPENDITURE CONTROL

A. Appropriations

The source of budgetary control is at the category and division level. The Assistant City Administrator/CFO may, at any time with the consent of the City Administrator, transfer any unencumbered appropriation from one line item to another line item within the same department, provided however, that no unencumbered appropriation may be transferred from one department or fund to another except upon the express approval of the City Council.

B. Amendments to the Budget

The budget may be amended by using the following criteria for evaluation of requests. The following questions must be answered by the appropriate department head prior to submittal to the City Council for approval and shall be included as a part of the agenda packet:

1. Is the request necessary?
2. Why was the item not budgeted in the normal budget process?
3. Why can a transfer not be made within the department?

In addition, the following conditions must be met:

1. The Assistant City Administrator/CFO certifies that there are available revenues in excess of those estimated in the budget or that unreserved/unencumbered fund balance is available; and
2. The City Council approves the budget amendment.

C. Accountability

Department heads will be responsible and accountable for the budget of their respective departments and capital improvement program projects under their supervision. Each department head will prepare his/her budget with diligent effort and foresight to provide the citizens of Conroe with the most cost efficient and effective services. Each department head will review the budgeted expenditures to determine if the level of service, as determined by City Council, can be maintained with the budgeted funds.

D. Reporting

Monthly reports will be prepared showing actual expenditures compared to the original budget distributed to the City Council and appropriate departments. The
department head will be responsible for reviewing the expenditures and making any spending adjustment that may be required.

E. **Expenditure Control**

Control measures for the approval of invoices are transcribed in Section 2-383 in the City’s Code of Ordinances. All requests for payment for goods or services must follow Section 2-383.

VI. **FISCAL MONITORING**

Reports shall be prepared and presented on a regular basis that analyze, evaluate, and forecast the City’s financial performance and economic condition for the current year and for multi-years.

1. **Financial Status and Performance Reports:** Monthly reports shall be prepared comparing expenditures and revenues to current budget, for the month and fiscal year-to-date. Quarterly reports shall be prepared projecting expenditures and revenues through the end of the year, and outlining any remedial actions necessary to maintain the City’s financial position.

2. **Five-Year Forecast of Revenues and Expenditures:** A five-year forecast of revenues and expenditures that includes a discussion of major trends affecting the City’s financial position shall be prepared. The forecast shall also examine critical issues facing the City, economic conditions, and the outlook for the upcoming budget year.

VII. **ACCOUNTING, AUDITING, AND FINANCIAL REPORTING**

The City shall comply with prevailing local, state, and federal regulations. Its accounting practices and financial reporting shall conform to generally accepted accounting principles as promulgated by the Governmental Accounting Standards Board (“GASB”), the American Institute of Certified Public Accountants (“AICPA”), and the Government Finance Officers Association (“GFOA”). The City Council shall select an independent firm of certified public accountants to perform an annual audit of all operations.

VIII. ** RATIOS, RESERVES, AND FINANCIAL STABILITY**

A. **Operational Coverage (No Operating Deficits)**
The City will maintain an operational coverage of $1.00, such that current operating revenues will at least equal or exceed current operating expenditures. Deferrals, short-term loans, or one-time sources will be avoided as budget balancing techniques.

B. Operating Reserves/Fund Balances (Revised for GASB 54)

The purpose of this policy is to establish a key element of the financial stability of the City by setting guidelines for fund balance. Unassigned fund balance is an important measure of economic stability. It is essential that the City maintain adequate levels of unassigned fund balance to mitigate financial risk that can occur from unforeseen revenue fluctuations, unanticipated expenditures, and similar circumstances. The fund balance also provides cash flow liquidity for the City’s general operations.

1. Classifications of Fund Balance: A fund’s equity – commonly referred to as ‘fund balance’ – is generally the difference between its assets and its liabilities. Fund balance will be displayed in the following classifications depicting the relative strength of the spending constraints placed on the purposes for which resources can be used. Committed, assigned, and unassigned fund balance will be considered unrestricted fund balance.

a. Non-spendable – amounts that are not in a spendable form or are required to be maintained intact. Examples include inventory and prepaid items.

b. Restricted – amounts that can be spent only for specific purposes stipulated by external resource providers such as grantors, bondholders, and higher levels of government through constitutional provisions or enabling legislation.

c. Committed – amounts constrained to specific purposes by formal action of City Council. Commitments may be changed or lifted only by the City Council taking the same formal action that imposed the constraint originally. Examples include contractual agreements approved by the City Council.

d. Assigned – amounts intended to be used by the City for specific purposes. Intent can be expressed by the City Council or by an official or body to whom the City Council delegates the authority. In governmental funds other than the General Fund, assigned fund balance represents the amount that is not restricted or committed. This indicates that resources in other governmental funds are, at a minimum, intended to be used for the purpose of that fund.

e. Unassigned – is the residual classification of the General Fund and includes all amounts not contained in other classifications. Unassigned amounts are available for any purpose.
2. **Authorization and Action to Commit Fund Balance:** The City Council is the government’s highest level of decision-making authority and the formal action that is required to be taken to establish, modify, or rescind a fund balance commitment is an ordinance approved by the Council at a City Council meeting. The ordinance must either be approved or rescinded, as applicable, prior to the last day of the fiscal year for which the commitment is made. The amount subject to the constraint may be determined in the subsequent period.

3. **Authorization and Action to Assign Fund Balance:** The City Council has authorized the City Administrator and Assistant City Administrator/CFO to assign fund balance to reflect the City’s intended use of resources. Assignments of fund balance by the City Administrator and Assistant City Administrator/CFO do not require formal action by the City Council; however, each assignment must be approved by both authorized officials before the item can be presented in the financial statements.

4. **Minimum Unassigned Fund Balance:** The City will strive to maintain an unassigned fund balance of not less than 90 days of the budgeted operational expenditures in the General fund. The purpose of this unassigned balance is to protect the City against short-term operating deficits in the General Fund.

   The unassigned fund balance will be available for the following purposes, only after a justification is provided by the appropriate department head, and its use has been approved by the Assistant City Administrator/Chief Financial Officer, City Administrator, and City Council:

   a. Defer short-term tax increases
   b. Cover revenue shortfalls
   c. Cover unanticipated expenditures

5. **Order of Expenditure of Funds:** When multiple categories of fund balance are available for expenditure, the City will start with the most restricted category – spending those funds first – before moving down to the next category with available funds.

6. **Governmental Fund Type Definitions:**

   a. **General Fund** – The General Fund should be used to account for and report all financial resources not accounted for and reported in another fund.
b. **Debt Service** – Debt service funds are used to account for and report financial resources that are restricted, committed, or assigned to expenditure for principal and interest.

c. **Special Revenue** – Special revenue funds are used to account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects.

d. **Capital Projects** – Capital projects funds are used to account for and report financial resources that are restricted, committed, or assigned to expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital assets. Capital projects funds exclude those types of capital-related outflows financed by proprietary funds or assets that will be held in trust for individuals, private organizations, or other governments.

7. **Utility Working Capital and Retained Earnings of Other Operating Funds:** In operating funds other than the General Fund, the City shall strive to maintain a positive retained earnings position to provide sufficient reserves for emergencies and revenue shortfalls. In addition, the minimum reserve balance in utility operating funds will be sixty (60) days of current year budgeted operating expenses. A debt coverage ratio of 125% to 150% will also be maintained in utility operating funds.

   The Fleet Services internal service fund will strive to maintain an operating reserve of 30 days.

8. **Rate Stabilization Reserve:** The City will designate an additional reserve balance in the Water and Sewer Operating Fund over and above the sixty (60) day reserve balance. The additional reserve target will be thirty (30) days of current year budgeted operating expenditures. The purpose of the Rate Stabilization Reserve is to protect the City from short-term operating deficits in the Water and Sewer Operating Fund. The funds will be available for the following purposes:

   a. Defer short-term rate increases.

   b. Cover revenue shortfalls.

   c. Cover unanticipated expenditures.

   d. Pay principle and interest on utility related debt.

9. **Use of Fund Balance/Retained Earnings:** Fund Balance/Retained Earnings shall be used only for emergencies, non-recurring expenditures, or major
capital purchases that cannot be accommodated through current year savings. Except for use in an emergency, such use shall not reduce the balance below the appropriate level set as the objective for that fund.

C. Liabilities and Receivables

Procedures should be followed to maximize discounts and reduce penalties offered by creditors. Current liabilities will be paid within thirty days of receiving the undisputed invoice. Accounts Receivable procedures will target collection for a maximum of thirty days from service. The Assistant City Administrator/CFO is authorized to write off uncollectable accounts that are delinquent for more than 270 days, if the proper delinquency procedures have been followed.

D. Capital Improvement Program and Debt Service Funds

1. Monies in the Capital Improvement Program Funds will be used within a timely manner. Balances will be used to generate interest income to offset construction costs.

2. Revenues in the Debt Service Fund are stable, based exclusively on property tax revenues and transfers from other funds. Reserves in the Debt Service Fund are designed to provide funding between the date of issuance of new debt and the time that property tax levies are adjusted to reflect the additional debt.

3. Revenue obligations will maintain debt coverage ratios, as specified by the bond covenants.

IX. INTERNAL CONTROL POLICY STATEMENT

A. Written Procedures

Whenever possible, written procedures will be established and maintained by the Assistant City Administrator/CFO for all functions involving cash handling and/or accounting throughout the City. These procedures will embrace the general concepts of fiscal responsibility set forth in this policy statement.

B. Department Head Responsibilities

Each department head is responsible for ensuring that good internal controls are followed throughout his or her department, that all Finance Department directives or internal controls are implemented, and that all independent auditor internal control recommendations are addressed.
C. **Revenue/Cash Handling**

The City recognizes the need for guidelines for collecting, receipting, and control of legal tender received by the City to provide reasonable internal control for safeguarding of the City’s assets. These guidelines are set forth in the “Revenue Handling Policy and Procedure Manual,” which is included in this policy as Appendix B.

X. **STAFFING AND TRAINING POLICY STATEMENT**

A. **Adequate Staffing**

Staffing levels shall be adequate for the fiscal functions of the City to operate effectively. Overtime shall be used only to address temporary or seasonal demands that require excessive hours. Workload-shedding alternatives will be explored before adding staff.

B. **Training**

The City will support the continuing education efforts of all City staff including the investment in time and materials for maintaining a current perspective concerning City issues. Staff will be held accountable for communicating, teaching, and sharing with other staff members all information and training materials acquired from seminars, conferences, and other related educational efforts.

XI. **CAPITAL IMPROVEMENT PROGRAM POLICY**

A. **Statement of Purpose**

Effective financial management of the City's resources requires that the budgetary plan for any one fiscal year be consistent with intermediate and long-range plans. As capital acquisitions and programs usually require a consistent application of effort and funds over a span of years, a capital improvement program and budget, as well as annual revenue and expenditure operating budgets, should be developed and presented to the City Council for approval and adoption.

Capital expenditures may generally be defined as those used to purchase land or equipment and/or to construct facilities or other improvements that are expected to provide services over a considerable period of time. In contrast, current or operating expenditures are generally those for an item or service that is used for a short time. Moreover, capital expenditures are usually relatively large when
compared with items in the annual Operating Budget. Capital budgeting, therefore, is based upon distinctions between expenditures that have only short-term or current benefits and those that have long-term benefits (capital).

The City's Capital Improvement Program is a ten-year plan, which identifies projected capital expenditures necessary to accomplish the City's long-range objectives and work program. As such, it sets forth each project, item, or other contemplated expenditure in which the City is to have a part and specifies the resources or funds estimated to be required and available to finance the projected expenditures. In relationship to the Capital Improvement Program, the City's Capital Budget is a plan of proposed capital outlays or expenditures, and the means of financing the same, for the current fiscal year. As such, it is included in the Operating Budget of the current fiscal year and represents the first year of the Capital Improvement Program.

The City's Ten-Year Capital Improvement Program is also categorized by the following types of capital improvements:

1. **General Government CIP:** Includes expenditures for the replacement, expansion, acquisition, and/or construction of streets, signals, facilities, parks and recreation, transportation, and/or drainage improvements.

2. **Water & Sewer CIP:** Includes expenses for the replacement, expansion acquisition, and/or construction of water and sewer infrastructure improvements.

3. **Conroe Industrial Development Corp. (CIDC) CIP:** Includes expenditures for capital improvements for the purposes of promoting economic development within the City of Conroe pursuant to state law regarding 4B sales tax.

The following policy statements guide the development and implementation of the City's Ten-Year Capital Improvement Program:

1. Capital expenditures will be made pursuant to the adopted Ten-Year Capital Improvement Program and the current fiscal year's Capital Budget.

2. Estimated cost and funding will be identified for each proposed capital expenditure prior to its submission to the City Council for inclusion in the Capital Improvement Program.

3. Intergovernmental assistance or grants-in-aid will be sought and used to finance only those capital expenditures and improvements, which are consistent with the adopted Capital Improvement Program.
4. At the end of each fiscal year, the Capital Improvement Program will be reviewed and an additional year will be added to replace the year just completed. During such annual review, priorities may be revised, with new capital expenditures and improvements added as justified, and other capital expenditures no longer justified being eliminated.

5. Recurrent capital expenditures for replacement, expansion and/or acquisition of plant, equipment, and/or motor vehicles will be financed from funds available and appropriated in the City's annual Operating Budget.

6. Non-recurrent capital expenditures for public improvements having a relatively larger cost and longer useful life, and which require additional funding over and beyond the City's annual Operating Budget, may be financed through the issuance or creation of appropriate long-term debt that coincides with the projected life of the improvement.

7. Any proceeds derived from the sale of the City-owned land located directly north of Conroe Park North, which was acquired through a land swap with Alton Hues for property adjacent to Carl Barton Park, will be divided in half and deposited in accounts specifically designated for park improvements and downtown improvement CIP projects.

B. Development of Capital Improvement Program

Although simple in theory, capital expenditure and public investment decision-making is not very simple in practice. Many of the benefits of a capital project or expenditure are often of an intangible nature and are not readily quantifiable; their value is common or social, involving the whole municipality; and usually is not easily ascertainable in monetary terms. This factor of common value and the lack of quantifiable benefits are the very reasons many such projects or activities are assumed by the public sector.

The City’s Ten-Year Capital Improvement Program consists of a comprehensive listing of carefully selected and coordinated capital improvements and expenditures which have been identified as necessary to accomplish the City's long-range objectives and work program and which the City can afford to implement. Development of the Capital Improvement Program is an annual process which includes identifying an inventory of needed projects, developing appropriate financing plans, and obtaining City Council and community input to establish project priorities.

Development of the Capital Improvement Program begins in March of each fiscal year when City department heads are required to submit to the City Administrator or his designee an inventory of capital improvements and expenditures contemplated for the next ten fiscal years. This inventory is generally based on
the expenditure's urgency, capital and operating costs, a general assessment of projected benefits, and the expenditure's contribution to the accomplishment of the City's long-range objectives and work program. Requests for consideration of capital improvements and expenditures often originate with diverse groups, including the City's operating departments and administrative staff, citizen advisory boards, City Council, and interested citizens.

Following development of the initial inventory of contemplated capital expenditures, the Finance Department staff conducts a preliminary economic and financial evaluation of the requested improvements and expenditures. This evaluation includes an assessment of the City's fiscal capacity for the ensuing ten-year period for the purpose of establishing as accurately as possible the funds which will be available for proposed capital expenditures during each year of the Capital Improvement Program and for ensuring that additional funds for increased operating expenses will be available, if necessary.

During the City's annual budget preparation process, the initial inventory of contemplated capital expenditures is preliminarily evaluated and ranked by priority before submission to the City Council. City Budget Staff usually completes this phase of development of the Capital Improvement Program. Upon completion of this review process, a recommended Ten-Year Capital Improvement Program is submitted to the Mayor & City Council for adoption.

The ultimate objective of this process is the development of a practical Ten-Year Capital Improvement Program that is both financially possible and acceptable to the community. Additionally, at the end of each fiscal year, the Capital Improvement Program is again reviewed, and the development process starts over. Priorities may be revised, with new capital improvements and expenditures added to the Capital Improvement Program, as necessary, while others, which are no longer justified, are eliminated. Each year an additional year is added to replace the year just completed, ensuring that the Capital Improvement Program will always cover a full ten-year period. With this development process, a long-range capital program is always available and current, but with only one year thereof actually committed as a part of the City's Capital Budget for the ensuing fiscal year.

XII. RELATIONSHIP OF CAPITAL BUDGET TO ANNUAL OPERATING BUDGET

During development of the City's Capital Improvement Program and Capital Budget, an evaluation of how capital expenditure decisions will affect annual operations and the City's Operating Budget must be made. Such an evaluation for recurrent capital expenditures for plant, equipment, and motor vehicles is usually not difficult, as the appropriations for such recurrent expenditures generally represent a relatively consistent proportion or percentage of the City's annual Operating Budget and can be financed on a "pay-as-you-go" basis from operating funds.
Evaluating the impact of large, non-recurrent capital expenditures on the City's Operating Budget and annual operations is more difficult, as such expenditures generally require additional funding over and beyond the fiscal capacity of the City's annual Operating Budget. However, evaluation of such non-recurrent capital expenditures is also more critical to the financial health and stability of the City for the following reasons:

1. Due to their relatively larger cost and longer life, capital expenditures for long-range public improvements may have to be financed on a “pay-as-you-use” basis through the issuance of long-term debt that coincides with the projected life of the improvement.

2. Such capital expenditures, therefore, may require a consistent application of effort and funds over a span of years.

3. The political and economic impacts of investments in long-range capital improvements extend far into the future.

4. Decisions to invest in long-range capital improvements are often irreversible, except at considerable financial and managerial costs to the City.

5. Such capital investment decisions may significantly alter or influence the City's ability to grow and prosper.

XIII. DEBT POLICY STATEMENT

The use of debt financing for long-term capital improvement programs is based upon a pay-as-you-use method of financing. In its purest theoretical form, pay-as-you-use financing means that every long-term capital improvement is financed by serial debt issues with maturities arranged so that the retirement of debt coincides with the depreciation or projected life of the improvement. Under this method of financing, the interest and debt retirement charges paid by each generation of taxpayers should coincide with their use of the physical assets or improvements and parallel the productivity of the social investment in the improvement.

In contrast to what often occurs under pay-as-you-go (or pay-as-you-acquire) financing, under pay-as-you-use, each user group pays for its own use and enjoyment of capital improvements, and desirable or urgently-needed capital improvements need not be delayed until sufficient funds can be accumulated. Additionally, no one is forced to provide free goods for a future generation of users or taxpayers or to contribute toward improvements for a city in which he or she will not live, nor will new members of the community enjoy the use of improvements without having contributed to their financing. In practice, the City uses a mix of these two basic methods to finance its capital assets, with pay-as-you-go financing used for recurrent capital expenditures, and with long-term,
non-recurrent capital expenditures financed on a pay-as-you-use basis.

**XIV. DEBT POLICIES FOR LONG-TERM CAPITAL IMPROVEMENTS**

The following policy statements govern the City’s use of debt to finance long-term, non-recurrent capital improvements:

1. Recurrent capital expenditures for replacement, expansion and/or acquisition of plant, equipment and/or motor vehicles will be financed on a pay-as-you-go basis from funds available and appropriated in the City’s annual Operating Budget. In certain limited circumstances, short-term debt or lease-purchase options may be considered for such items.

2. Only long-term, non-recurrent capital expenditures for public improvements having a relatively larger cost and longer useful life, and which require additional funding over and beyond the fiscal capacity of the City’s annual Operating Budget, will be financed through the issuance or creation of long-term debt.

3. Long-term, non-recurrent capital improvements will not be debt-financed for periods exceeding the projected useful life of the improvement.

4. Revenue sources that will be used to pay long-term debt will be conservatively projected to ensure that such debt is adequately and soundly financed.

5. Long-term debt will be used to finance non-recurrent capital expenditures or improvements only when it has been determined that the estimated flow of benefits to be derived over the useful life of the improvement exceeds the principal cost of the improvement, plus interest. Such determination will be based on the improvement’s urgency, capital and operating costs, a general assessment of projected benefits, both direct and indirect, and the improvement’s contribution to the accomplishment of the City’s long-range objectives and work program.

6. Long-term debt will be used to finance non-recurrent capital expenditures or improvements only when it has been determined that future generations of citizens and/or taxpayers will derive benefit from the improvement.

7. The City’s total general obligation debt will not exceed five percent of its assessed valuation.

8. The City will use special assessment revenue bonds or other self-supporting bonds where possible and appropriate to finance long-term,
non-recurrent capital improvements, rather than use General Obligation Bonds.

9. The City will establish and maintain effective communications with bond rating agencies to keep them informed of its financial condition.

10. The City will comply with its annual continuing disclosure obligations pursuant to SEC Rule 15c2-12.

A. Types of Debt

Before bonded long-term debt is issued, the impact of debt service on the total annual fixed costs will be analyzed.

1. General Obligation Bonds (GO’s): General Obligation Bonds will be used only to fund capital assets of the general government and are not to be used to fund operating needs of the City. General Obligation Bonds are backed by the full faith and credit of the City as well as the ad valorem tax authority of the City. The term of a bond issue will not exceed the useful life of the asset(s) funded by the bond issue and will generally be limited to no more than thirty years. General Obligation Bonds must be authorized by a vote of the citizens of the City of Conroe.

2. Revenue Bonds (RB’s): Revenue Bonds will be issued to provide for the capital needs of any activities where the capital requirements are necessary for continuation or expansion of a service which produces a revenue and for which the asset may reasonably be expected to provide for a revenue stream to fund the term of the debt service requirements. The obligation may not exceed the useful life of the asset(s) to be funded by the bond issue and will generally be limited to no more than thirty years.

3. Certificates of Obligation, Contract Obligations: Certificates of Obligation or Contract Obligations will be used in order to fund capital requirements, which are not otherwise covered under either Revenue Bonds or General Obligation Bonds. Debt service for Certificates of Obligation or Contract Obligations may be either from general revenues, backed by a specific revenue stream, or by a combination of both. Generally, Contract Obligations will be used to fund capital assets where full bond issues are not warranted as a result of the cost of the asset(s) to be funded through the instrument. The term of the obligation may not exceed the useful life of the asset(s) to be funded by the proceeds of the debt issue and will generally be limited to no more than twenty years.

4. Method of Sale: The City will use a competitive bidding process in the sale of bonds unless the nature of the issue warrants a negotiated bid. In
situations where a competitive bidding process is not elected, the City will publicly present the reasons why a negotiated process is being utilized, as well as will oversee, with the advice of the financial advisor, the selection of the underwriter or direct purchaser.

5. **Bidding Parameters:** The notice of sale will be carefully constructed so as to ensure the best possible bid for the City, in light of the existing market conditions and other prevailing factors. Parameters to be examined include:

   a. limits between lowest and highest coupons;

   b. coupon requirements relative to the yield curve;

   c. method of underwriter compensation, discount or premium coupons;

   d. use of TIC vs. NIC;

   e. use of bond insurance;

   f. deep discount bonds;

   g. variable rate bonds; and

   h. call provisions.

B. **Refinancing Current Debt**

   In the event that interest rates are significantly lower than in prior years, staff will evaluate and pursue the refinancing of the City’s existing debt. Consideration will be given in such circumstances as to the amount of interest cost savings, current and future debt service requirements, and bond maturity dates.

C. **Bond Ratings**

   When considering a new debt issuance, staff will pursue the upgrade of its bond ratings by the major rating agencies.

B. **Analysis of Financing Alternatives**

   Staff will explore alternatives to the issuance of debt for capital acquisitions and construction projects. These alternatives may include, but are not limited to following: grants in aid, use of reserves, use of current revenues, contributions from developers and others, leases, and impact fees.
1. **Disclosure:** Full disclosure of operations will be made to the bond rating agencies and other users of financial information. The City staff, with the assistance of financial advisors and bond counsel, will prepare the necessary materials for presentation to the rating agencies, aid in the production of Offering Statements, and take responsibility for the accuracy of all financial information released.

   a. **Federal Requirements** – The City will maintain procedures to comply with arbitrage rebate and other Federal requirements. Procedures to comply with IRS arbitrage requirements are included with this policy as Appendix D.

   b. **Debt Structuring** – The City will issue bonds with an average life of thirty years or less, not to exceed the life of the asset(s) acquired.

   The structure should approximate level debt service unless operational matters dictate otherwise or, if market conditions indicate, a potential savings could result from modifying the level payment stream.

   Consideration of market factors, such as the tax-exempt qualification, minimum tax alternative, and so forth, will be given during the structuring of long-term debt instruments.

**XV. INVESTMENTS**

The City’s idle cash shall be invested in such a manner so as to ensure the absolute safety of principal and interest, to meet the liquidity needs of the City, and to achieve the highest possible yield in accordance with the City’s investment policy. Interest earned from investment shall be distributed to the operating, internal service, and other City funds from which the money was provided. Cash forecasting models and procedures will be employed to maximize the amount of investment funds.

All investment activity will be in accordance with the City’s investment policy, which is included with this policy as Appendix C. The investment policy will be reviewed and, if needed, updated annually by the City Council.

**XVI. INTERGOVERNMENTAL RELATIONS, GRANTS, ECONOMIC DEVELOPMENT, AND RISK MANAGEMENT**

A. **Intergovernmental Relations**

The City shall coordinate efforts with other governmental agencies to achieve common policy objectives, share the cost of providing government services on an
equitable basis, and support appropriate favorable legislation at the state and federal levels.

1. **Interlocal Cooperation in Delivery Services:** In order to promote the effective and efficient delivery of services, the City shall work with other local jurisdictions to share on an equitable basis the costs of services, to share facilities, and to develop joint programs to improve service to its citizens.

2. **Legislative Program:** The City shall cooperate with other jurisdictions to actively oppose any state or federal regulation or proposal that mandates additional City programs or services and does not provide the funding from implementation.

B. **Grants**

The City shall seek, apply for, obtain and effectively administer federal, state, and foundation grants-in-aid that address the City’s current and future priorities and policy objectives.

1. **Grant Guidelines:** The City shall seek, apply for, and obtain those grants that are consistent with priority needs and objectives identified by Council.

2. **Indirect Costs:** The City shall recover indirect costs to the maximum amount allowed by the funding source. The City may waive or reduce indirect costs if doing so will significantly increase the effectiveness of the grant.

3. **Grant Review:** The City shall review all grant submittals for the following: 1) their cash or in-kind matching requirements; 2) their potential impact on the operating budget, including obligations by the City to fund programs on an ongoing basis, even after the grant funding is terminated; and 3) the extent to which they meet the City’s policy objectives. If there are cash match requirements, the source of funding shall be identified and approved prior to application. A semi-annual report on the status of grant programs and their effectiveness shall also be prepared and presented to City Council by the Grant Administrator responsible for each grant.

4. **Documentation:** The City will take all steps necessary to ensure that proper supporting documentation is obtained to support the allowable activities completed under each grant program. The records will be obtained and retained according to the specific grant program.

5. **Grant Program Termination:** The City shall terminate grant-funded
programs and associated positions as directed by the City Council when grant funds are no longer available unless alternate funding is identified.

6. **Grant Compliance:** The City shall at all times be compliant with a grant’s terms and conditions, including Uniform Grant Guidelines, if applicable. The department seeking the grant will assign a grant administrator who will be responsible for grant compliance.

C. **Economic Development**

The City shall initiate, encourage, and participate in economic development efforts to create job opportunities and strengthen the local economy and tax base.

1. **Commitment to Expansion and Diversification:** The City shall encourage and participate in economic development efforts to expand Conroe’s economy and tax base, increase local employment, and invest when there is a defined specific long-term return. These efforts shall not only focus on new areas but on other established sections of Conroe where development or redevelopment can generate additional jobs and other economic benefits.

2. **Tax Abatements:** The City shall develop a tax abatement policy to encourage commercial and/or industrial growth and development throughout Conroe. The City shall balance the long-term benefits of tax abatements with the short-term loss of tax revenues prior to the granting of the abatement. Factors considered in evaluating proposed abatements for development include the location of the project, its size, the number of temporary and permanent jobs created, the costs and benefits for the City and its impact on Conroe’s economy and other factors specified in the City’s Tax Abatement Policy.

3. **Increase Non-Residential Share of Tax Base:** The City’s economic development program shall seek to expand the non-residential share of the tax base to decrease the tax burden on residential homeowners.

4. **Coordinate Efforts with Other Jurisdictions:** The City’s economic development program shall encourage close cooperation with other local jurisdictions to promote the economic well-being of this area.

D. **Risk Management**

The City will utilize a safety program, an employee health program and a risk management program to prevent and/or reduce the financial impact to the City due to claims and losses. Transfer of liability for claims through transfer to other entities through insurance and/or by contract will be utilized where appropriate. Prevention of claims through the safety program and the employee health
program will be employed. Liabilities will be self-insured where it is financially feasible.
