Conroe Connection and Byk-Rak

Using Bike Racks

Conroe Connection buses have bike racks on the front of the bus*. Any Conroe Connection rider may use these racks; however, Conroe Connection is not responsible for damaged or stolen bicycles. When loading or unloading a bicycle, just follow these instructions!

* Some vehicles will not be equipped with bike racks, including Paratransit.

LOADING

1. Remove any loose items that may fall off your bike while the bus is in motion.

Once the bus comes to a stop, step to the front of the bus to load your bike. Make sure that the bus operator sees you.

3. Lift your bike and load it properly onto the rack, carefully positioning the tires into the appropriate slots.

4. Raise the support arm up and over the front tire until it hugs the tire. You're good to go! Hop aboard.

2. To lower the bike rack from the stowed position, squeeze the handle with one hand and fold down the rack.

If the rack is empty, be sure to place your bike on the inside rack closest to the bus operator.
UNLOADING

1. As the bus approaches your stop, notify the bus operator that you will be unloading a bike.

   Lower the support arm to release the front wheel.

2. You may now lift your bike out of the rack.

3. If there are no bikes on the rack and no one else is waiting to load, secure the bike rack before departing.

4. Simply lift the rack until it locks into place in the upright position.

   Move away from the bus and signal to the operator that it's safe to leave.
